MONOFILAMENT POLYPROPYLENE  
SUTURES

**OAK TREE**<sup>®</sup>  
SURGICAL

The non-absorbable suture, comprising Polypropylene material, guarantees enduring tensile strength retention in tissue, even under severe infection conditions, without exhibiting any signs of weakness. It provides robust and stable tissue support, owing to its single-strand structure. The suture boasts a smooth surface for seamless tissue penetration, reducing the risk of infection by inhibiting bacterial growth. Additionally, it features minimal suture twisting, facilitating easy and secure knot tying.
