NYLON MONOFILAMENT
SUTURES

OAK TREE[®]
SURGICAL

Nylon Polyamide Non-absorbable suture, composed of Polyamide 6 and Polyamide 6.6, guarantees extended, enduring tensile strength in tissue. Crafted from a single strand, it facilitates smooth passage through tissues, reducing trauma and the risk of infection by minimizing bacterial growth. Its flexibility enhances ease of use for skin sutures, and the inherent properties of nylon enable the production of exceptionally fine threads, making it a popular choice for ophthalmic surgery and microsurgery.
